

THE HIGHEST PROTECTION WITH BARE HAND FEELING

Safety and comfort go hand in hand.

Statistics show that, too often, safety gloves are not used because they are uncomfortable or impede work: the comfort and breathability qualities of fabrics made with Filtes Difentex yarns allow gloves to be worn all day without discomfort, ensuring compliance with regulations. Furthermore, greater comfort means greater safety and a better fit ensures higher productivity. The Filtes Difentex technology that we developed has achieved unique performance levels on the market for the production of cut resistant gloves: thin and soft yet incredibly cut-resistant.

THE HIGHEST PROTECTION ALL IN ONE.

Filtes DifenTex meets the highest level of protection according to the new norms ISO13997 and ANSI. Moreover, more end-users want gloves that could protect in any work conditions. Filtes DifenTex offers multi-risk solutions, adding high abrasion resistance, thermal protection and electrostatic discharge on the top of cut protection.

CUT

We are spinning
the future of
high-performance
protection

DIRT MASKING

Available in black to cover dirt

DEXTERITY

Ultra thin up to 18GG knitting to maintain perfect finger mobility

HIGH CUT PROTECTION

Reaches the highest level according with ISO13997 and ANSI/ISEA 105-16

MULTI-RISK

Offers thermal protection according to EN407 and electrostatic discharge according to ENs

LIGHTWEIGHT

Excellent sensitivity for better productivity

BREATHABLE

Maximum comfort as the skin breathes through the fabrics

SAFE FOR YOUR SKIN

Meets OEKO TEX standard 100 and complies with Reach

TOUCHSCREEN

Allows the manipulation of any touchscreen
